## TESTING YOUR PRIVATE WELL WATER

Indiana State  
Department of Health

Test every year

1

**Know What Can Pollute Your Water:**

- Bacteria & Nitrates from human and animal wastes
- Fertilizers & Pesticides
- Industrial Products & Wastes
- Heavy Metals

*Did you know that young children are the most likely to become ill from contaminated water?*

2

**Know Where To Go for Help:**

- Local health department
- Water Supply Information [www.in.gov/isdh/20408.htm](http://www.in.gov/isdh/20408.htm)
- Certified Drinking Water Laboratories in Indiana: [www.in.gov/isdh/22450.htm](http://www.in.gov/isdh/22450.htm)
- Well Disinfection: [www.in.gov/isdh/files/Well\\_Disinfection.pdf](http://www.in.gov/isdh/files/Well_Disinfection.pdf)

3

Test every year

**Know Your Responsibilities:**

- Arrange for or collect your own samples.
- Use only containers supplied by the testing laboratory.
- Follow the sample collection instructions provided by the testing laboratory.
- Deliver the samples to the testing lab within the required time limits.
