

RESOLUTION NO. 2020-21

OF THE BOARD OF COMMISSIONERS OF LAPORTE COUNTY, INDIANA

RESOLUTION SUPPORTING THE FUNDING BY NIRPC OF
INDIANA UNIVERSITY'S REGIONAL GREENHOUSE GAS INVENTORY COHORT

- WHEREAS,** LaPorte County recognizes the clear relationship between energy consumption, greenhouse gas emissions, emergency management, planning and economic development and aims to continue to fill gaps within the region and pursue initiatives that will achieve measurable improvements and stress the importance in building resilience; and
- WHEREAS,** a greenhouse gas inventory quantifies the amount of greenhouse gases released within a defined boundary in a twelve-month period and creating a greenhouse gas inventory requires whole systems approach consisting of planning and preparation for the region; and
- WHEREAS,** a greenhouse gas inventory provides data on the amount of energy consumed such as the diversity of energy supplied to the grid and a community's vehicle type and fuel usage distribution; and can be used to set energy reduction targets and develop a plan for reducing emissions derived from energy consumption which will translate into cost savings; and
- WHEREAS,** the Resilience Cohort is a program offered by Indiana University that provides towns, cities and counties the resources, technical assistance and an intern to complete a community-scale greenhouse gas inventory; and
- WHEREAS,** participating in Indiana University's Resilience Cohort program helps communities that the Northwest Indiana Regional Planning Commission represents meet the NWI 2050 goals of maintaining a regional inventory of alternative energy and fuel infrastructure as well as collect data on the usage and locations; analyze NWI energy and fuel use and carbon footprint trends; and continue working with university partners on collection and analyzing data; and
- WHEREAS,** the Resilience Cohort is grant-funded and therefore presents a real opportunity to have an emissions inventory done at a fraction of the cost of an inventory done by a private consultant; and
- WHEREAS,** a regional application through Northwest Indiana Regional Planning Commission (NIRPC) offers the Northwest Indiana region the opportunity to save costs and time in applying to the cohort; and

ORIGINAL

WHEREAS, a first step to initiate a regional application is by passing a resolution requesting NIRPC to fund the Resilience Cohort Program.

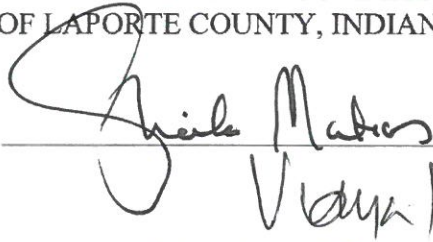

NOW, THEREFORE, LET IT BE RESOLVED:

That the LaPorte County Commission, a member of the Northwest Indiana Regional Planning Commission, supports the Northwest Indiana Regional Planning Commission in funding the Indiana University Resilience Cohort Program, which creates a greenhouse gas inventory.

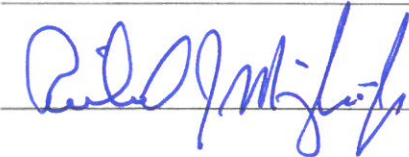

The LaPorte County Commission supports the Northwest Indiana Regional Planning Commission convening stakeholders (public, private, academia) in the development of a greenhouse gas inventory through Indiana University's Resilience Cohort program.

SO RESOLVED THIS 2nd DAY OF SEPTEMBER, 2020

BOARD OF COUNTY COMMISSIONERS
OF LAPORTE COUNTY, INDIANA

Sheila Madson
Vice Chair

Paul J. Mijls

ATTEST: 
LaPorte County Auditor

Chief Deputy Auditor
