

Addendum 1

10/1/2020

**There will be a voluntary pre-bid meeting on October 15th at 1:00 pm local time.
The location will be at the Laporte County Court House, Complex rm #3.
Please have any additional questions to the highway engineer by October 12th.**

Questions that were brought up concerning the LaPorte County Infrastructure Project.

1. Are all of the attachments listed on page 31 of the specs (Article 7) required? I am not finding the exhibits in the specs.

Certificates for:

Responsible Bidder Requirements-2013-009

D-2556-Iron and Steel

Form_9_Wage-Fringe_Benefit_Certification

E-Verify Affidavit Form I-9

I will supply them in the addendum.

We will not need the OEE-1 or OEE-2 compliance for this job.

Also, there are no DBE requirements.

2. The Bid Bond form found on page 35 under description (Project Name – Include Location) is prefilled with Water Main Replacement – Dugger, Indiana. Will you be sending out a new Bid Bond Form?

Please replace Addendum Bond Page 35 with modified form.

3. The sanitary sewer specifications are telling me that I need to reference MSD Exhibit D. I cannot find this exhibit in either the plans or specifications provided.

MC Sanitary Sewer Specifications are included in the addendum.

4. Can you tell me if there will be a group site visit? Or will it be on an individual basis? We will be bidding this project for the electrical scope of work.

There will not be an official on-site meeting.

See above for Date, Time, and location of the pre-bid meeting.

5. Can you please provide your measurements for the HMA in each section for the Laporte County Water and Sewer Extension project? I am having a tough time trying to figure out how the quantities were determined.

The engineer estimated the total HMA base at 715 tons and the HMA binder at 141 tons.

There are 7 asphalt drive repairs.

One road crossing.

A col de sac repair.

An estimated 15 boring pits along 300 N and 950 W.

There may also be some intersection repair/reconstruction at 300 N and 950 W.
