For Immediate Release:

December 10, 2021

The CDC has issued booster eligibility guidance for ages 16-17. Based on those recommendations, the Indiana Department of Health supports the administration of booster doses to individuals who attest to meeting CDC guidelines as outlined below.

- 16 and older and completed their primary vaccination series of Pfizer at least 6 months ago.
- 18 and older and completed their primary vaccination series of Moderna at least 6 months ago or completed their primary vaccination of Johnson & Johnson at least 2 months ago.

Teens 16-17 years old are only eligible to receive Pfizer COVID-19 vaccine booster. Individuals 18 and older may choose which vaccine they receive as a booster dose. Some people may have had a preference for the vaccine type that they originally received and others may prefer a different booster. CDC's recommendations now allow for this type of mix and match dosing for booster shots.

#### Mission Statement:

*"To engage and partner in a collaborative and responsive effort with the community and local organizations with respect to the diversity of the community to better serve present and future generations."*

# Everyone Ages 16 and Older Can Get a Booster Shot
